

Veeam Cloud Connect

Secure, Affordable Offsite
Backups and Replicas in the Cloud

Simply point your Veeam backup and/or replica jobs to Concero's secure cloud and enjoy offsite backups and disaster recovery without the cost and complexity of

maintaining an offsite infrastructure. from Concero's hosted backup and replica repositories directly from the Veeam console and track cloud repository consumption.

making the solution **affordable for small and medium sized business.**

All of your data is stored at a top-tier, SSAE 16 SOC II certified data center located in Kelowna, BC.

It's as easy as point-and-click to secure your Veeam backups & replicas on our cloud.

maintaining an offsite infrastructure.

End-to-end encryption means you can rest easy. All data is encrypted before it leaves your network perimeter without negatively impacting data compression and WAN acceleration functionality.

Get **complete visibility and control** into your cloud backups and replication. Access and recover data

Leverage Veeam's **modern backup technology**, including: backup copy jobs with built-in WAN acceleration, forever incremental backups, GFS (grandfather-father-son) retention policies, and more — all built into one product

Pay a monthly fee for only the cloud storage used. There is no infrastructure to buy or manage,

FAST FACTS

3-2-1 Rule

The 3-2-1 rule states that you need to keep **three** copies of your data, stored on **two** types of media, with **one** copy being off site.

Getting backups off site can be challenging due to limited bandwidth, exploding data volumes and a lack of resources required to build or maintain a true off site backup repository.

With Veeam Cloud Connect you can master the 3-2-1 rule without dumping money and resources into a second site or expensive connectivity upgrades. Just leverage a secure cloud backup repository from Concero and take advantage of Veeam's built-in WAN acceleration technology.

Veeam Cloud Connect

Simple and Secure Offsite Backups

- Veeam Cloud Connect integrates Concero's backup repositories directly into your Veeam backup console.
- Backups are securely transferred over a single, secure SSL/TLS connection, making firewall configuration simple and eliminating the need for a VPN connection.
- Access and recover data in hosted backup repositories directly from the backup console; track cloud repository consumption and receive reminders for hosted storage renewals.

Advanced DR-as-a-Service Option

- Asynchronously replicate VMware and HyperV VMs to Concero's secure cloud.
- Full-site failover to a remote DR site from anywhere with just a few clicks through a secure web portal and partial-site failover to instantly switch over to selected VM replicas only.
- Full and partial failback to restore normal business operations.
- Built-in network extension appliances to simplify networking complexity and preserve communication with and between running VMs, regardless of the physical location.

- One-click failover orchestration for quick execution and site failover testing for failover simulation, without disrupting production workloads.
- Single-port connectivity via a secure, reliable TLS/ SSL (Transport Layer Security/Secure Sockets Layer) connection to a service provider with traffic encryption.
- Multiple traffic-reduction technologies, including built-in WAN acceleration and replica seeding.
- To get started simply point your replica jobs to Concero's secure cloud with the credentials we provide.

Secure Data in Transit and at Rest

- SSAE 16 SOC II certified data center.
- Data transferred over Secure Sockets Layer (SSL) encrypted connections.
- Server Side Encryption (SSE), using 256-bit Advanced Encryption Standard (256-bit AES) in transit and at rest.
- Concero service-level agreement (SLA) with five nines reliability.

ABOUT CONCERO

Concero is a managed cloud services provider. We fuel our customer's growth and profitability by solving challenging IT problems through reliable, secure, and cost-effective cloud solutions.
